**Re: EQUIPMENT REMOVAL ESTIMATE
PROPOSED MACRO CELL TELECOMMUNICATIONS FACILITY
ARX WIRELESS SITE NAME: NY0248 – CHESTER DPW
CO HWY 45, CHESTER, NY 10950
TECTONIC W.O. 11137.002**

Dear Mr. Coppins,

At your request, we are providing an equipment removal cost estimate for this proposed telecommunications facility. This project consists of the installation of cellular antennas and associated equipment mounted on a proposed monopole, the installation of equipment at grade within a proposed fenced compound, and new power and fiber utility infrastructure. This removal estimate is prepared to account for the costs to remove all components of the installation, including the following:

- All panel antennas, related equipment, cabling, and associated mounts/hardware
- One (1) 150' monopole
- Demolition of the tower pier foundation to a depth of 2' below grade
- Verizon Wireless ground equipment, including slabs, cabinets, h-frame, generator, and utility equipment
- Common use utility equipment including meter bank, telco demarcation box, and associated h-frame
- Removal of all fencing and bollards and associated foundations (full depth)
- Removal of any/all underground conduit and grounding infrastructure within a depth of 2' below grade

The total construction cost associated with the scope of work listed above is approximately \$15,000.
