

EQUIPMENT OPERATION and MAINTENANCE PLAN

215 BLACK MEADOW ROAD

CHESTER, NEW YORK

Solar Energy Equipment O & M Plan

1. Periodic inspections of the perimeter fence, solar array, and connecting infrastructure will be made by maintenance contractor.
2. Repairs to the security fence shall be made as needed.
3. Erosion in access road(s) shall be repaired and stabilized.
4. Repairs to solar energy collecting and distribution equipment shall be made as needed.
5. Fences shall be raised approximately 6 inches off of the ground to permit movement of ground dwelling animals.
6. Repairs to or replacement of utility poles shall be made as needed.
7. Access road(s) shall be maintained.

Vegetation Maintenance Plan

1. Vegetation within the solar array, under and around the energy collecting panels and inside the perimeter fence shall be mowed periodically as needed. Areas outside the fence which are currently mown may continue to be mowed.
