PROJECT NARRATIVE:

The project is to rebuild two (2) sets of billboards on the Johnson Farm. The site would comprise of four sign faces, two at each site. The first set would be rebuilt on a single pole with two 14'X48' Digital's, one face toward the east and the other toward the west, on the west end of the property. The second site would be a single pole with two 14'X48' non-digital sign faces on them.

The project is to rebuild existing sign faces and convert two (2) existing non digitals to digitals. No clearing or timber will be harvested. No fill will be required at the site, but an excavation of 10'X10'X11' square will be needed for footings for the poles. Minimal grading will be done around each pole, approximately 15'X15' square. The project is not within 100 feet of the Sate wetlands or 100 year flood plan.

A handwritten signature in black ink, appearing to read "Douglas Barthel", with a long horizontal flourish extending to the right.
