TOWN CLERK
CHESTER, NEW YORK

Date July 21, 2022

Dear, Chester Town Board

Due to the issues that have happen these last few days with our computers. We are asking the Chester town board to replace our original computer and in addition purchase a second computer for John Mardula. The reason for the request is that the computer technician recommend that we replace our computer, because of the age and that we are running window 7.

Sincerely

Chris Cocks

Water department supervisor

JUL 25 2022

Supervisor,

TOWN OF CHESTER
CHESTER, NEW YORK

To add insult to injury over the course of the last week with our IT issues, I was informed that the water department computer is not held on any server. It was a free-standing machine with all data stored locally on the computer.

The computer is running Windows 7 which is no longer supported by Microsoft and is a security risk in its current state.

Attached please find a quote to replace the Water Department computer and an additional request to have a second PC purchased for John Mardula.

Can you please place this on the agenda? Over the course of the five water funds in the equipment line, we should be okay to purchase. At a minimum we need one.

Thank you for your consideration.

Tanya McPhee

Subject: pricing for computer for water

Tanya, here is two options for the water guys. Both have a 3 year dell warranty. Leadtime is a month or so, but that can change day by day.

Optiplex 5400 AIO – 24" all in one computer - \$879

Optiplex 7000 – Optiplex SFF desktop computer - \$625
- 22" monitor: \$105

- 27" monitor: \$140
